

10-Point Crypto Casino Trust Checklist (2025 Edition)

Before you buy or stake, ask these:

- ✓ Is randomness powered by on-chain VRF (e.g., Chainlink)?
- ✓ Are staking contracts visible and immutable?
- ✓ Is there a public burn record with timestamps?
- ✓ Do dev wallets hold less than 5%?
- ✓ Are there whale wallets that could dump?
- ✓ Does the token use proxy contracts (red flag)?
- ✓ How often does the DAO vote—and who votes?
- ✓ Are rewards predictable or randomized?
- ✓ Is the roadmap available (even partial leaks)?
- ✓ Is your wallet activity anonymous or public?

My Tip:

Print this. Use it before any gambling token. If 3+ answers are “No,” walk away.
